Industrial equipment protection, documented stage by stage.

04 / COMPLETED PROTECTION STAGE

Secured outer protection visible in the project record

01 / EQUIPMENT CONDITION

03 / PRIMARY PROTECTION

THE FACTS

Application	Large industrial equipment
Protection scope	Handling-aware primary and outer covering
Evidence	Six original project photographs
Disclosure	Customer and exact site withheld

DOCUMENTED APPROACH

01 Record geometry and handling interfaces before protection.

02 Keep lifting, support and access points usable through the sequence.

03 Apply primary wrapping around the actual equipment envelope.

04 Restrain the outer weather cover for the project handling context.

WHAT THIS RECORD PROVES

The photographs establish first-hand BENZ activity and visible packaging stages on a large machinery project.

EVIDENCE BOUNDARY

The images do not by themselves establish the customer identity, material grade, route, duration or a measured performance result. Those details are published only when project records and disclosure permission support them.
